# MARKET UNSTEADY AT WEEK'S CLOSE

Desire to Take Profits Is Main Feature of the Short Final Session.

FOREIGN INFLUENCES IN

Financial World Now Waiting to See What London Will Do.

NEW YORK, Oct. 30 .- The speculative tone showed unsettlement during the short session of the stock exchange today. The close of the week brought some natural inclination to close up contracts and take profits. This was complastized by doubts of what the bank statement, which was published after the market closed, would show. There were new questions raised regarding the foreign money position and its probable bearing on the markets for

Bank of England to maintain its con-trol of the London money market re-vived a discussion of the response like-by to be made by other markets and the ly to be made by other markets and the probability of a further advance in the official discount rate of the Imperial Bank of Germany was revived. The part played by the political outlook in shaping the policy of the Bank of England is receiving increasing consideration in view of the opinion expressed in London that a general election in January is likely.

pressed in London that a general election in January is likely.

If the result of the Bermondsey bye-election this week shall confirm the House of Lords in the determination to reject the budget framed by the Liberal government of England, there will be financial consequences to consider which will call for attention in other financial consequences to consider which will call for attention in other financial centers as well as in Loudon. As pointed out by the London Would involve a heavy loan to carry on the government. Based on the present price of British consols, this loan would be issued at a very low price, "lower," says the Statist, "than the present generation has hitherto thought probable. And it is quite possible, further, that the new issue would lead believes of existing stocks of all kinds to sell on a great scale for the purpose of being able to subscribe to an issue of consols brought out at so low an issue price. The formal denial by the president of the Amalgamated Copper cumpany of rumors of a combination of copper interests of an agreement to curtail production induced a reaction frem vesterday's strength in that group. There were points of strength level and there in special stocks, but the prevailing tone of stocks was beary.
